

The Air Pollution Model (TAPM)

Price List

Companies and individuals may use TAPM under licence to CSIRO. TAPM is provided as executable code, which will run under the Windows operating system. TAPM includes a global terrain and land use database, and includes synoptic analyses databases for one region for two calendar years (usually the last two complete years, but alternative years can be selected).

- TAPM software: AUD\$5,000
- TAPM additional licence: AUD\$3,000
(+GST in Australia)

Note that the TAPM package will only be sent once payment on the invoiced amount has been made.

An upgrade (software only) from any version of TAPM to TAPM V4 is available.

- TAPM software upgrade: AUD\$2,000
- TAPM additional licence upgrade: AUD\$1,000
(+GST in Australia)

Note that additional licences are classified as the 2nd or further licence purchased by an organisation.

Extra synoptic analyses datasets for other regions or other calendar years are available. Synoptic analyses for one region for up to one year are contained in one dataset. For the current year, users can be supplied with analyses on quarterly basis.

- TAPM synoptic analyses (yearly dataset): AUD\$500 annual fee
- TAPM synoptic analyses (quarterly datasets, current year): AUD\$800 annual fee
(+GST in Australia)

Note that synoptic analyses datasets will usually be available before the end of the month following the end of the data period. For example, yearly datasets will usually be available before the end of January of the following year and quarterly datasets will usually be available before the end of April, July and October (current year), and January (following year). An invoice for the annual fee will be issued once the first dataset has been sent. Dataset regions are defined as:

- Region 1: AUS, NZL, NCD, SAS, CAS, NAS and RUS tiles
- Region 2: EUR, RUS, AZO, MID, NAF and SAF tiles
- Region 3: ALA, CAN, NAM, CAM, SAM and ARG tiles

See the TAPM web page for more information on available tiles/years.

See www.cmar.csiro.au/research/tapm for more information on TAPM.

Chemical Transport Model (CTM) (Option for Applications Requiring More Complex Chemistry)

Price List

Companies and individuals may use the CTM under licence to CSIRO. The CTM is provided as executable code, which will run under the Windows operating system, coupled to the TAPM system as TAPM-CTM. A licence for TAPM is a prerequisite to obtaining the CTM.

- CTM software: AUD\$6,000
- CTM additional licence: AUD\$3,000
(+GST in Australia)

Note that the CTM package will only be sent once payment on the invoiced amount has been made.

For CTM Licences in Australia, it is recommended that users (up to 3 people) should attend a 2-day training course at CSIRO in Melbourne.

- CTM Training Course: AUD\$2,000
(+GST in Australia)

Major upgrades from earlier versions of the CTM are available.

- CTM software upgrade: AUD\$3,000
(+GST in Australia)

Note that additional licences are classified as the 2nd or further licence purchased by an organisation within a single office/location.

See www.cmar.csiro.au/research/tapm for more information on TAPM.

CCAM-T

(Option for Atmospheric Forecasting Applications)

Price List

Companies and individuals may use CCAM-T under licence to CSIRO. CCAM-T is provided as executable code, which will run under the Windows operating system to generate synoptic scale weather forecasts for use by TAPM. A licence for TAPM is a pre-requisite to obtaining CCAM-T.

- CCAM-T software: AUD\$5,000
- CCAM-T additional licence: AUD\$3,000
(+GST in Australia)

Note that the CCAM-T package will only be sent once payment on the invoiced amount has been made.

Major upgrades from earlier versions of the CCAM-T are available.

- CCAM-T software upgrade: AUD\$2,000
(+GST in Australia)

Note that additional licences are classified as the 2nd or further licence purchased by an organisation.

By default, CCAM-T synoptic scale weather forecasts are limited to the Australian region. Please contact us for information regarding the use of CCAM-T for regions other than Australia.
