

RV Investigator

ADCP Processing Report

Voyage ID:	in2019_v03
Voyage title:	A coupled bio-physical, ecosystem-scale examination of Australia's International Indian Ocean Expedition Line.
Mobilisation:	Fremantle, 0900 AWST Monday 13 May 2019
Depart:	Fremantle, 1500 AWST Monday 14 May 2019
Return:	Fremantle, 0800 AWST Friday 14 June 2019
Demobilisation:	Fremantle Friday 14 June 2019
Voyage Manager:	Hugh Barker
Chief Scientist:	Lynnath Beckley
Affiliation:	Murdoch University
Report compiled by:	Richard Atkinson

1 Summary

Data was collected during in2019_v03 for the duration of the voyage. Data was collected using UHDAS and post-processed using CODAS.

Both the RDI Ocean Surveyor 150kHz ADCP and the RDI Ocean Surveyor 75kHz ADCP were run in narrowband.

Internal triggering was used.

The drop keel was at 2m below the waterline for the duration of the voyage.

See the voyage computing and electronics report for more details regarding data acquisition.

2 Processing Background

The University of Hawaii's CODAS software revision 2903:dd2872d4fef0 dated Apr 09 2019 was used for data post-processing.

3 Processing Notes

Narrowband data was collected on OS75 and OS150 sounders.

Heading data was corrected using patch_hcorr.py following which a calibration was applied:

	<u>os75</u>	<u>os150</u>
Amplitude	1.0022	1.0076
Phase	0.2479	-0.0394

Data was masked where instrument anomalies were suspected and where the os75 and os150 data differed significantly.

The os150 data had a daily pattern of deep tails of apparently good data to below 400m below gaps of poor 'percentage good' data up to 250m. This effect was assumed to be due to diurnal migration of biology to greater depth during daylight hours as the pattern correlated approximately to 08:00 to 17:00 local time. All data below the gap was removed for each day during the editing process on the assumption that it could lead to incorrect interpolation. An example of the data before and after editing is included below (Figure 1 and Figure 2).

Figure 1: os150 unedited data for 26 May 2019

Figure 2: os150 edited data for 26 May 2019

NetCDF files in2019_v03_os75nb.nc and in2019_v03_os150nb.nc were produced.

4 Area Covered

Please see the webpy_bb and webpy_nb folders for plots of collected data.

5 netCDF Data Headers
