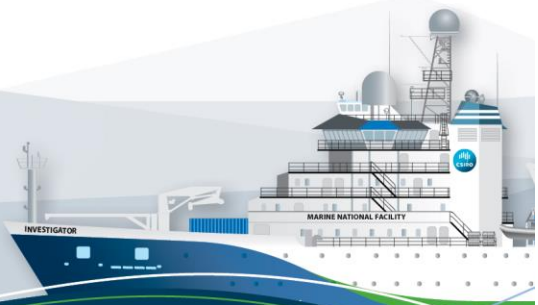
RV *Investigator*

ADCP Processing Report

Voyage #:	IN2017_V02
Voyage title:	Southern Ocean Time Series
Depart:	Hobart, 2200 Thursday, 16 March 2017 UTC
Return:	Hobart, 2200 Monday, 27 March 2017 UTC
Chief Scientist:	Tom Trull
Affiliation:	CSIRO/ ACE CRC
Report compiled by:	Steven Van Graas



Contents

1 Summary

Data was collected during in2017_v02 for the duration of the voyage. Data was collected using UHDAS and post-processed using CODAS. Only the OS75 was in operation for this voyage, due to a fault with the OS150 pending repair.

See the voyage computing and electronics report for more details regarding data acquisition. Drop keels were both deployed at mid extension, approx. 8.5m below the waterline.

Data coverage and quality is generally good. The ADCP was switched off during transits through marine parks to and from the SOTS site.

2 Processing Background

The University of Hawaii's CODAS software was used for data post-processing.

3 Processing Notes

See summary.

4 netCDF Data Headers
