## ABSTRACT

Unique standard names for all described Australian fishes (about 4,500 species) are presented for the first time. Leading fish taxonomists, fish-book authors, members of the Fish Names Committee, and representatives of key stakeholder groups cooperated to produce the standard names list, which was also made available for public comment. The current list once-and-for-all eliminates confusion surrounding fish names in Australia. Species that were previously known by up to a dozen or more names around the country now have a single standard name, and species that lacked a common name now have one assigned. Seafood Services Australia Ltd, which is registered with Standards Australia as a standards development organisation, combined the list presented here with the names of imported fishes, commercial groupings of species, and commercial invertebrates (domestic and imported) to produce the Australian Standard Fish Names List (ASFNL). The ASFNL will form part of the Australian Fish Names Standard. While this current publication links each standard name with its scientific name (and authority) and its Codes for Australian Aquatic Biota (CAAB) code, work remains to present the list in a more user-friendly, visually sympathetic, and searchable manner. Necessary enhancements, which are required sooner rather than later, include the incorporation of obsolete names and species images. The inclusion of distribution maps and user-friendly diagnostic characters to identify species would also improve its utility. Such improvements, especially if available both in hardcopy and online, would provide widely accessible and highly valuable tools to inform and educate the fishing and scientific communities, as well as consumers and other interested users.

## 1. INTRODUCTION

### 1.1 Background

Australia's ichthyofauna is highly diverse. At least 5000 species (about 4500 described plus more than 300 new or as yet unidentified species, total is likely to exceed 5000) occur in Australian seas (Hoese *et al.*, in press), which represent nearly 20% of the world's fishes (Nelson, 2006). While many hundreds of Australian fishes have never been given a local common name, others have multiple names. For example, names for common recreational and commercial species often vary regionally, and dozens of species have acquired at least five or six names. One, *Arripis truttaceus* (Western Australian Salmon), has been referred to by at least 20 published common names. Some species have different names depending on their growth stage. For example, *Pagrus auratus* (Snapper), is called 'Cockney', 'Red Bream', 'Squire', 'Snapper' and 'Old Man Snapper' based on size and head shape. In total, about 13,000 names have been used in Australia for about 3000 fish species, and about 1000 had never been assigned a name.

Fish names are frequently referred to by an extremely broad variety of user groups including commercial fishers, recreational fishers, seafood consumers, scientists, fisheries administrators, aquarists, editors, educators, lawyers, legislators, and authors. The unavailability or inconsistent use of common names of fishes has, at times, created problems for all these groups, not least of which, the seafood industry. It has also led to serious confusion when interpreting catch-return sheets and fisheries data that are based on common names. Fish identification guides to the Australian fauna often use more than a single name for a species. Obviously, a widely adopted list of standard names would bring stability across user groups and would be beneficial to all.

The call for a uniform list of names has been made a number of times. In 1911, NSW government fisheries identity, D. G. Stead, was the first to plead for more uniformity in fish names (Whitley, 1972). In the highly acclaimed *Fish and Fisheries of Australia*, Roughley (1951) reported that during the first half of the 20<sup>th</sup> Century, several attempts to determine uniform Australian names for fishes known by multiple names across jurisdictions, 'met with little success'. Roughley flagged a more successful 1947 meeting of the chiefs of State Fisheries Departments and tabled a list of the 35 or so Uniform Names of Australian Fishes that were agreed upon. The need for a standard list of common names was again prophetically highlighted by eminent Australian scientist, Gilbert Whitley, in 1972. Although enthusiastic of the need for a standard, Whitley stated that 'the day is probably distant when we shall have standard, suitable, names for most of the 2,500 different species of Australian fishes.'

Finally, dedicated cooperative work by various agencies Australia-wide has now produced this milestone publication: an approved list of Australian standard fish names (Appendix A). This effort, since the mid-1980s, originally focused on the names of commercial species, but in the early 2000s the focus expanded to cover all named Australian fishes. It was also recognised that although the 350 or so major commercial species had unique common (or marketing) names, secondary commercial and bycatch species mostly had

---

either multiple common names or none at all. Lead agencies driving the process to assign a standard name to all species were the Fisheries Research & Development Corporation (FRDC)—including the industry-supported Fish Names Committee (FNC) and its predecessors, and Seafood Services Australia (SSA)—and CSIRO Marine and Atmospheric Research. However, the final selection of names also involved fish taxonomists from all States and Territories (except the Australian Capital Territory), in addition to leading fish-book authors and representatives of key user groups.

Other countries have similarly adopted standard lists of common names of fishes. For example, the American Fisheries Society recently published the Sixth Edition of *Common and Scientific Names of Fishes from the United States, Canada, and Mexico* (Nelson *et al.*, 2004). The first edition was in 1948. The inclusion of Mexican fishes was new in the latest edition and contributed to an increase in the number of species listed to 3,700. This North American list is limited to continental shelf species (i.e. it excludes species that only occur deeper than 200 m). Following the North American lead, *Common and Scientific Names of the Fishes of Southern Africa* was published in two parts—*Marine Fishes* by Smith (1975), and *Freshwater Fishes* by Jackson (1975). The marine fish component was again restricted to continental shelf species. Japan has also standardised fish common names (in Japanese). Nakabo's (2002) *Fishes of Japan* (English Edition) is considered the standard for fish names, with the Ichthyological Society of Japan posting additional, post-2002 names (i.e. new records and new species) on their website. It is a requirement for Japanese fish taxonomists to propose a new Japanese common name in conjunction with a new scientific name.

## 1.2 Strategy and scope

The overarching approach taken in the process of producing a standard names list of Australian fishes was to (1) standardise the names for described Australian fishes, then (2) proliferate the standard in order to educate user groups. Early adoption of standard names Australia-wide will be assisted by consistency across various types of publications. To that end, representatives of diverse user groups were invited to contribute to the names selection. To set an example of inter-agency cooperation, the standard names listed here will also be included in the forthcoming ABRS Pisces Catalogues (Hoese *et al.*, in press).

In addition to an open process of names selection that allowed for comprehensive public comment (see Methods below), the names will be approved under a national standard. To achieve this, SSA (which facilitates the FNC) was accredited by the standards development body, Standards Australia, as a standards development organisation. The list of standard names fulfils the requirements of Standards Australia as a national standard.

The present document presents the standard names list for described species occurring in Australian continental marine and freshwater environs (4,506 species from 355 families) as of February, 2006. It is not intended to review standard names (locally or internationally) or to document in detail the history of the standard names process to date. It is, however, the first step in advertising the complete catalogue of standard names, particularly to the scientific and management communities. The list herein links standard names to CAAB codes, and current scientific names and their authorities.

The order of families follows the cataloguing order used in Australian museums (which is based on a 3-digit numbering system from 1 to 470) and does not conform to current systematic knowledge. The order presented has been used for cataloguing fish specimens in Australian museums for more than 30 years, and is based on fish relationships proposed by Greenwood *et al.* (1966). By and large, the family names used in the present list conform to those used by Hoese *et al.* (in press) but there are exceptions (for example, where some families have been recently lumped or split) and minor variation in family common names.

It is acknowledged that the list below is not user-friendly, and there remains the need to better educate other user groups, including seafood consumers and the general public. This will be achieved over time through various searchable and updatable online facilities (such as the CAAB portal, <http://www.marine.csiro.au/caab>, and SSA's fish names website, <http://www.seafood.net.au/fishnames>) and through the cooperation of fish-book authors. As new fish books are published using the standard names, the names will be adopted nationally. The approved Australian Standard Fish Names List will be included in the Australian Fish Names Standard. Details of the Standard and the latest list of Standard Names are available at the fish names website.

## 2. METHODS

### 2.1 Process

The following process was undertaken to select and ratify standard names.

Names used in Australia for each species were sourced by the editors. The name-selection protocols (see below) were then applied to select one name per species. The resultant 'strawman' list was circulated for comment to key stakeholders, fish taxonomists and fish-book authors via the Fish Names Expert Group (FNEG), and advertised for public comment. The lists were posted online via CSIRO's CAAB portal for easy access. When requested, hardcopies were posted to interested parties.

Comments received, both from the FNEG and from the public, were subsequently addressed and resolved at a two-day Common Names Workshop of fish name specialists and key stakeholder representatives, which was held in Adelaide in September, 2004. The Workshop was a joint CSIRO/SSA process held under the auspices of the FNC (to ensure wide stakeholder ownership and adoption). Names that were not commented on prior to the workshop were deemed to be acceptable to all user groups and the public, and were considered to be ratified by the FNEG. Most public feedback was via designated State Representatives, who each coordinated responses from their State/Territory.

Table 1 lists the participants in the Common Names Workshop. The FNEG comprises those who participated in the workshop plus two participants (Jeff Johnson, Queensland Museum; Klynton Wanganeen, Aboriginal and Torres Strait Islander Commission) who were unable to attend the meeting in person but who were able to contribute to the process nonetheless.

**Table 1. List of participants in the Common Names Workshop in Adelaide, September, 2004.**

Name	Expertise	Affiliation/Institution	State/Territory
Gerry Allen	Fish Taxonomist & Author	Western Australian Museum (Associate)	WA
Di Bray	Fish Taxonomist & Author	Museum Victoria	VIC
Noel Gallagher	Seafood Importers representative on FNC	Seafood Traders of Australasia	Qld
Martin Gomon*	Fish Taxonomist & Author	Museum Victoria	VIC
Doug Hoese*	Fish Taxonomist & Author	Australian Museum	NSW
Patrick Hone	FRDC Representative on FNC	Fisheries Research and Development Corporation	ACT
Barry Hutchins*	Fish Taxonomist & Author	Western Australian Museum	WA
Stan Jarzynski	DAFF Representative on FNC	Department of Agriculture Fisheries and Forestry	ACT
Keith Jones*	South Australian Representative	SA Research and Development Institute	SA
Rudie Kuiter	Fish Taxonomist & Author	Aquatic Photographics	VIC
Helen Larson*	Fish Taxonomist & Author	Museum & Art Gallery of the Northern Territory	NT
Peter Last	Fish Taxonomist & Author	CSIRO Marine and Atmospheric Research	TAS
Rob Lewis	Workshop Chairman	SA Research and Development Institute	SA
Roy Palmer	FNC Chairman		VIC
John Paxton	Fish Taxonomist & Author	Australian Museum	NSW
John Roach	ASIC representative on FNC	Master Fish Merchants Association	NSW
Nick Ruello	Fish Names Committee Member	Ruello & Associates	NSW
Bill Sawynok	Recreational Anglers Representative	Infofish Services	QLD
Adam Smith*	Fish Names Committee Member	GBR Marine Park Authority	QLD
Alan Snow	Fish Names Committee Secretariat	Seafood Services Australia	QLD
Lyle Squire	Aquarium Trade Representative	Cairns Marine Aquarium Fish	QLD
Richard Stevens	Fish Names Committee Member	WA Fising Industry Council	WA
Don Tuma	Fish-book Author		QLD
Bruce Wallner	Australian Fisheries Managers Forum Representative	Australian Fisheries Management Authority	ACT
Gordon Yearsley*†	Fish Taxonomist & Author	CSIRO Marine and Atmospheric Research	TAS

\*Signifies State/Territory Representative; †Participated via conference phone.

After the workshop, the entire list was again posted online and advertised for public comment. Although the public consultation phase was officially 3 months, the list was open for comment for about 1 year.

Late in 2005, the names of species that had been described or newly recorded from Australia since the workshop, and names of species that had been inadvertently overlooked in the original ‘strawman’ list, were ratified out-of-session by the FNEG (using the same protocols as were applied before and during the workshop) and advertised for public comment.

In February 2006, the list was considered final with respect to development of the national standard and for publication. New names (i.e. newly described or recorded from Australia) will be considered later by the FNEG and subsequently incorporated into the Standard.

The standard referred to is an Australian Standard developed by Seafood Services Australia Ltd (SSA), which is accredited as a standards development organisation by Standards Australia. The Australian Standard Fish Names List comprises not only the individual Australian fish names published here but also names for imported fishes, group names that cover more than one

species, and names for commercial invertebrates (both domestic and imported). Further information is available at SSA's fish names website, <http://www.seafood.net.au/fishnames>.

## 2.2 Names selection

### 2.2.1 Protocols (rules) for names selection

This section details the protocols used for the selection of standard names for Australian fishes under the following headings:

- General Principles
- Steps for Standard Name Selection
- Guidelines for Selecting Names
- Guidelines for Deriving New Names (where no Australian name exists)
- Syntax and Style Rules

The protocols were ratified and applied by the Fish Names Expert Group. The current protocols are available in the Australian Fish Names Standard.

The following definitions apply:

*standard name*—the unique common name selected and approved for a particular species, and ratified by SSA in accordance with Standards Australia requirements; the names listed herein as standard names will become official standard fish names when the Australian Fish Names Standard is published.

*scientific name*—a fish's unique name based on international rules of nomenclature; each unique scientific name is a binomen, consisting of a genus name and a species name, both of which are italicised.

*common or vernacular name*—the non-scientific name(s) applied to a species.

*obsolete name*—any common or vernacular name that has been applied to a particular species but is not the standard name of that species or species group.

#### *General Principles*

The following list, which includes 14 general principles for selection of standard names, has been complied and adapted from Smith (1975) and Nelson *et al.* (2004). The principles have been used to produce three steps (explained below) in the name selection process.

1. Each species and family shall be assigned a single, approved standard name (i.e., a common or vernacular name) and no two species or family shall have the same approved standard name.
2. Subspecies and hybrids will not generally be given a standard name.

3. Historical names in regular use or widely accepted names or combinations will have priority over less used or less well-known names.
4. Simplicity of names and name structure shall be fundamental to the naming process. (i.e., whenever possible, long-winded names, and unnecessary suffixes and hyphens should be avoided).
5. Selected names should avoid ambiguity. Where names combine well (elements are easily determined and unambiguous), use one word (e.g., Elephantfish). Where combinations involve vowel or letter pairing, use hyphens (e.g., Blue-eye, Spot-tail). Separate names to maintain ‘readability’ if the word elements are unclear (e.g., as a suffix, ‘fish’ combines well but ‘shark’ is sometimes confusing). The combining of long names with multiple descriptors should be avoided (e.g., ‘Sixgillstingrays’ is unwieldy and better separated as ‘Sixgill Stingrays’).
6. Names should generally conform with other members of the familial or generic-level grouping (e.g., an un-named species of flathead should typically be called ‘Newname Flathead’).
7. Generic or family names (i.e., scientific names) may be employed outright (e.g., Remora for *Remora remora*) or in modified form (e.g., Oxeye Oreo for *Oreosoma atlanticum*) as standard names.
8. A standard name need not be intimately tied to scientific name changes (i.e., if the scientific name of a particular species changes, the standard name should remain unaffected unless there is a good reason for change).
9. Standard names shall always start with a capital letter; each word will be capitalised except after a hyphen (e.g., False Silver Whiptail but Spot-tail Shark). Exceptions include proper nouns (place names) such as ‘Indo-Pacific Snaggletooth’ and ‘North-West Hardyhead’. The original principle proposed was that standard names shall not be capitalised in sentence use except for those elements that are based on proper nouns (e.g., silver dory but Sydney skate). However, FNEG discussions at the Adelaide workshop resulted in a change to capitalisation. This is consistent with a similar change made recently for North American fishes.
10. Patronyms or names intended to honour persons (apart from those that are historically entrenched) are discouraged but should be used when no user-friendly, diagnostic descriptors are available. When used, these names should include an apostrophe (e.g., Ray’s Bream). Names derived from ships should not be represented in the possessive case (e.g., Kapala Stingaree). The original principle proposed here was that possessive standard names should not include an apostrophe. However, FNEG discussions at the Adelaide workshop resulted in a change to apostrophes.
11. Care should be taken to construct the correct form of the descriptor (e.g., ‘Orangespot’ refers to a species with a single orange spot or bilateral pair of spots; ‘Orangespotted’ refers to a species with multiple orange spots; ‘Orange Spotted’ is nonspecific (e.g., ‘Orange Spotted Catshark’ refers to a member of a group of ‘spotted catsharks’ in which the species has either orange spots or an orange body – in this case, the former). The abbreviated form is used if the first part of the word defines (explicitly or implicitly)

the number of the profiled feature (e.g., ‘Threespot Cardinalfish’; ‘Multispot Lanternfish’).

12. The expression ‘common’, or emotive terms such as ‘dangerous’, as part of a fish’s name shall be used sparingly. Descriptors of size (e.g., little, large) should also be avoided unless strongly diagnostic of the species or group in question.
13. The use of standard names that are also widely used for other organisms should be avoided unless pre- or suffixed to make them distinct.
14. Family group names generally follow internationally accepted names (Nelson, 2006) unless alternatives are well entrenched in Australian mainstream literature.

#### *Steps for Standard Name Selection*

The following steps were used to select candidate names for the review process:

- STEP 1 (a) If the species has one or more vernacular or marketing names in Australia, go to STEP 2.
- (b) If the species does not presently have a documented vernacular or marketing name in Australia, derive/assign a name based on the general principles above and Guidelines for Deriving New Names below.
- STEP 2 (a) If the species already has a unique marketing name (FNC approved) then retain that name (but give due attention to general principles above).
- (b) Otherwise, go to STEP 3.
- STEP 3 (a) If the species has a single vernacular name (iconic or otherwise) in Australia then retain that name in full or in part (giving due attention to general principles above).
- (b) If the species has more than one vernacular name, select a name based on the general principles above and the Guidelines for Selecting Names below.

#### *Guidelines for Selecting Names*

The following criteria should be considered when selecting a name from a group of potentially available names. The relative importance of each will depend on the case at hand and flexibility is often needed.

1. Names that have been widely used across Australia for more than a century (historical names), or nationally entrenched names, would generally have preference over recently derived, less well-used names.
2. A regional name where the species is most commonly encountered/caught would normally have priority over less frequently used names or names used where the species is less common.
3. Names used in recent mainstream field guides and group treatments with regional relevance (e.g., Allen, Midgley & Allen, 2002; Kuiter, 2000) have wide public exposure

and should generally be followed. It should also be noted that later guides are more likely to have applied each common name to the correct species.

4. A name that most effectively distinguishes a species from its closest relatives (e.g., by reference to a diagnostic feature) is preferred over less obvious or irrelevant combinations.
5. Where none of the above applies, names should be selected in full or in part based on their simplicity, unambiguous nature, and readability.

#### *Guidelines for Deriving New Names (where no Australian name exists)*

Names need to be derived on a case-by-case basis using one or more of the following criteria and considering relevant issues relating to the selection of existing names (above):

1. Adopt commonly used, local group names where they exist.
2. Use FAO or other international group names that are well known and widely applied elsewhere.
3. Construct descriptors based on -
  - a. use of etymology of the epithet;
  - b. structural attributes, coloration, and colour pattern;
  - c. suitable adjectival modifiers reflecting the geographic distribution of the species;
  - d. ecological or biological characteristics of the species;
  - e. colourful, romantic, fanciful, metaphorical, otherwise distinctive and original names.
4. Use well-accepted aboriginal names as descriptors.
5. Repetition of frequently used descriptors (e.g., spotted, banded, striped, Australian, deepwater) should only be used when no other distinctive attribute exists.

#### *Syntax and Style Rules*

The following syntax and style rules were adopted (in addition to some mentioned above):

- Hyphens are used sparingly, to improve readability or to define certain place names (e.g., Indo-Pacific) as described above. Reducing the use of hyphens simplifies the list and generally removes subjectivity as to where they should or shouldn't be used. If there are three or four word components in a name, the last two represent the group name (without use of a hyphen to show that connection). For example, the 'Bighead Gurnard Perch' is a type of gurnard perch. However, there are rare exceptions to the rule, usually when the first two words represent a geographic descriptor (e.g., 'Bass Strait Flounder').

- Where possible, group name components are joined together to form one word, but this often creates clumsy words. For example ‘Carpetshark’ seems to work well, but ‘Sharpnoseshark’ is somehow clumsy and better presented as ‘Sharpnose Shark’.
- Abbreviated forms of words and combined words are preferred except where there is some advantage in retaining the unabbreviated form or in keeping the words separate.
- Use ‘and’ rather than ‘&’.
- Use ‘zigzag’ rather than ‘zig-zag’.

Notwithstanding all of the above, the following exceptions and rules were employed for special cases:

- Words that end in ‘ate’. Most words that end in ‘ate’ are adjectives, so a ‘d’ is not required at the end of the word (e.g., ‘Reticulate Pipefish’ rather than ‘Reticulated Pipefish’). For verbs, such as ‘inflate’, a ‘d’ is required at the end of the word (e.g., ‘Inflated Whiptail’). The following ‘ate’ words were used:
  - ‘Annulate’ adj
  - ‘Decorate’ v, therefore ‘Decorated’
  - ‘Delicate’ adj
  - ‘Elongate’ v/adj
  - ‘Fimbriate’ adj
  - ‘Frigate’ n
  - ‘Immaculate’ adj
  - ‘Inflate’ v, therefore ‘Inflated’
  - ‘Lanceolate’ adj
  - ‘Ocellate’ adj
  - ‘Ornate’ adj
  - ‘Reticulate’ adj
  - ‘Striate’ v/adj
  - ‘Variegate’ v, therefore ‘Variegated’
  - ‘Vermiculate’ v/adj
- Words preceding ‘band’ and ‘banded’ are combined (e.g., ‘Goldband Fusilier’; ‘Orangebanded Coralfish’) except for unwieldy combinations (e.g., ‘Oblique-banded Snapper’).
- Words preceding ‘bar’ and ‘barred’ are combined (e.g., ‘Orangebar Threefin’; ‘Blackbarred Wrasse’) except for unwieldy combinations (e.g., ‘Oblique-bar Monocle Bream’).
- Words preceding ‘blotched’ are combined (e.g., ‘Whiteblotched Sole’).
- Words following ‘double’ are combined (e.g., ‘Doubleline Fusilier’) except when followed by an ‘e’ (e.g., ‘Double-end Pipehorse’) or based on readability (i.e., ‘Double-row Grubfish’).

- Words following ‘false’ are combined (e.g., ‘Falsespine Catfish’) or separated (e.g., ‘False-girdled Reefgoby’) based on readability.
- Words following ‘half’ are combined except in one case (i.e., ‘Half-and-half Puller’).
- Words preceding ‘line’ and ‘lined’ are usually combined (e.g., ‘Manyline Leatherjacket’; ‘Narrowlined Puffer’) except in a few cases based on readability (e.g., ‘Two-line Monocle Bream’).
- ‘Margin’ (a noun) is used if the type or colour of the margin is defined (e.g., ‘Brownmargin Flathead’); ‘Margined’ (an adjective) is used if it’s stand alone (e.g., ‘Margined Coralfish’).
- ‘Multi’ is usually combined (e.g., ‘Multispot Lanternfish’) except for one unwieldy case (i.e., ‘Multi-thread Dragonfish’).
- ‘Shorthead’ is one word (e.g., ‘Shorthead Lamprey’).
- ‘Spangled’ not ‘spangle’ (e.g., ‘Spangled Emperor’).
- Words preceding ‘speckled’ are combined (e.g., ‘Bluespeckled Pipefish’).
- Words preceding ‘spine’ are combined (e.g., ‘Shortspine Goosefish’).
- Words preceding ‘spotted’ are combined (e.g., ‘Bluespotted Tuskfish’) except for longer words that end in ‘y’ (e.g., ‘Sparsely-spotted Stingaree’), which are unwieldy if combined.
- Words preceding ‘streak’ and ‘streaked’ are combined (e.g., ‘Redstreaked Blenny’).

In exception to the above, it was hard to be consistent with joining ‘goby’ to its descriptor (e.g., ‘Eel Goby’ vs ‘Eelgoby’) but the rules used were that the descriptor was combined with ‘goby’ if it was a singular adjective or noun (e.g., ‘Shrimpgoby’, ‘Coralgoby’) but not if the descriptor was composite words combined (e.g., ‘Flaphead Goby’, ‘Fatnose Goby’). Exceptions included long words that failed to combine well (e.g., ‘Silhouette Goby’) and unusual words (e.g., ‘Feia Goby’).

### **3. FUTURE WORK**

The list herein links a standard name to the scientific name of each Australian fish species. The inclusion of authorities and CAAB codes removes ambiguity regarding the species in question (e.g. by removing confusion surrounding homonyms), and provides a link to additional information (via the CAAB website).

However, it is recognised that the list in this current format is not user-friendly. Suggested improvements relate to both the online availability of the names and any future printed versions. At a minimum, the following improvements should be incorporated into internet/printed versions of the standard names list: (1) the ability to search all previous (obsolete) names for each species; (2) the ability to sort the list in various ways; (3) at least one photo of each

species, and more than one photo per species where appropriate (for example, where the coloration of females and juveniles differs from that of males); (4) a fillet photo for each commercial species; (5) a short list of simple diagnostic characters for each species; (6) distribution maps; (7) ordering the families in currently acceptable phylogenetic order (ie in the order of their natural groupings); and (8) links to other valuable information (such as each species' genetic barcode, *etc*).

The inclusion of obsolete names is an essential capability that would allow users to quickly link a current standard name with a name they may be more familiar with. With such large numbers of species and names used in Australia, it is probably impossible for anyone to identify and/or remember them all. Therefore, tools that associate previous names with standard names would be frequently used and very valuable.

The inclusion of images would allow a user to quickly (even if somewhat crudely) recognise a species in question. Past experience with marketing names guides (i.e. *Recommended Marketing Names for Fish*, 1985, 1988; *Marketing Names for Fish and Seafood in Australia*, 1995; *Handbook of Australian Seafood — an Identification Guide to Domestic Species*, 1999) taught the FNC and its predecessors the importance and value of including images in publications that are essentially simply a list of names. Media and industry interest in the first two marketing versions (1985, 1988), which excluded images, was low, but when photos and illustrations of each species were included in the third version (1995), the profile of the series rose significantly. Soon after, when photos, diagnostic characters, distribution maps and other relevant information was included in the *Handbook of Australian Seafood* (1999), the book topped best-seller lists in Australia.

## ACKNOWLEDGMENTS

The Fisheries Research & Development Corporation and Seafood Services Australia have been strong advocates for standard names. In particular, we acknowledge the foresight and hard work of FRDC's past Director, Peter Dundas-Smith, and the Chairman of SSA, Ted Loveday. FRDC's current Director, Patrick Hone, and numerous other FRDC staff contributed positively to the standard names process. This report was compiled with support from the FRDC (Project 2201/231). The current Fish Names Committee acknowledges the commitment of previous committees to drive the process of names standardisation since the early 1980s. We appreciate the contributions of various fish taxonomists, including Hiro Motomura, Hans Ho and Chris Kenaly, and Ichthyological Collection staff at various Australian institutions. Many thanks to those who contributed via the Fish Names Expert Group workshop in Adelaide, particularly Rob Lewis who kindly and efficiently facilitated the meeting. Thank you also to the numerous CSIRO Marine and Atmospheric Research staff who assisted with the process, in particular Tony Rees, Alastair Graham and Daniel Gledhill.

## APPENDIX A: LIST OF AUSTRALIAN STANDARD FISH NAMES

<b>37003000</b>	<b>LAMPREYS — Petromyzontidae</b>		
37003001	Pouch Lamprey — <i>Geotria australis</i> Gray, 1851	37013005	Rusty Carpetshark — <i>Parascyllium ferrugineum</i> McCulloch, 1911
37003002	Shorthead Lamprey — <i>Mordacia mordax</i> (Richardson, 1846)	37013018	Ginger Carpetshark — <i>Parascyllium sparsimaculatum</i> Goto & Last, 2002
37003003	Non-parasitic Lamprey — <i>Mordacia praecox</i> Potter, 1968	37013004	Varied Carpetshark — <i>Parascyllium variolatum</i> (Duméril, 1853)
<b>37004000</b>	<b>HAGFISHES — Myxinidae</b>		
37004002	Broadgilled Hagfish — <i>Eptatretus cirrhatus</i> (Forster, 1801)	<b>37013000</b>	<b>BLIND SHARKS — Brachaeluridae</b>
37004001	Longfin Hagfish — <i>Eptatretus longipinnis</i> Strahan, 1975	37013013	Colclough's Shark — <i>Brachaelurus colcloughi</i> (Ogilby, 1908)
		37013007	Blind Shark — <i>Brachaelurus waddi</i> (Bloch & Schneider, 1801)
<b>37005000</b>	<b>COWSHARKS — Hexanchidae</b>		
37005001	Sharpnose Sevengill Shark — <i>Heptanchias perlo</i> (Bonnaterre, 1788)	<b>37013000</b>	<b>WOBBEGONGS — Orectolobidae</b>
37005005	Bluntnose Sixgill Shark — <i>Hexanchus griseus</i> (Bonnaterre, 1788)	37013011	Tasselled Wobbegong — <i>Eucrossorhinus dasypogon</i> (Bleeker, 1867)
37005004	Bigeye Sixgill Shark — <i>Hexanchus nakamurai</i> Teng, 1962	37013003	Spotted Wobbegong — <i>Orectolobus maculatus</i> (Bonnaterre, 1788)
37005002	Broadnose Shark — <i>Notorynchus cepedianus</i> (Péron, 1807)	37013001	Banded Wobbegong — <i>Orectolobus ornatus</i> (De Vis, 1883)
		37013017	Northern Wobbegong — <i>Orectolobus wardi</i> Whitley, 1939
		37013012	Cobbler Wobbegong — <i>Sutorectus tentaculatus</i> (Peters, 1865)
<b>37006000</b>	<b>FRILL SHARKS — Chlamydoselachidae</b>		
37006001	Frill Shark — <i>Chlamydoselachus anguineus</i> Garman, 1884	<b>37013000</b>	<b>LONGTAIL CARPETSHARKS — Hemiscylliidae</b>
<b>37007000</b>	<b>HORN SHARKS — Heterodontidae</b>	37013008	Grey Carpetshark — <i>Chiloscyllium punctatum</i> Müller & Henle, 1838
37007003	Crested Hornshark — <i>Heterodontus galeatus</i> (Günther, 1870)	37013014	Epaulette Shark — <i>Hemiscyllium ocellatum</i> (Bonnaterre, 1788)
37007001	Port Jackson Shark — <i>Heterodontus portusjacksoni</i> (Meyer, 1793)	37013015	Speckled Carpetshark — <i>Hemiscyllium trispiculare</i> Richardson, 1843
37007002	Zebra Hornshark — <i>Heterodontus zebra</i> (Gray, 1831)	<b>37013000</b>	<b>ZEBRA SHARKS — Stegostomatidae</b>
		37013006	Zebra Shark — <i>Stegostoma fasciatum</i> (Hermann, 1783)
<b>37008000</b>	<b>GREY NURSE SHARKS — Odontaspidae</b>		
37008001	Greynurse Shark — <i>Carcharias taurus</i> Rafinesque, 1810	<b>37013000</b>	<b>NURSE SHARKS — Ginglymostomatidae</b>
37008003	Sandtiger Shark — <i>Odontaspis ferox</i> (Risso, 1810)	37013010	Tawny Shark — <i>Nebrius ferrugineus</i> (Lesson, 1830)
<b>37009000</b>	<b>MEGAMOUTH SHARKS — Megachasmidae</b>	<b>37014000</b>	<b>WHALE SHARKS — Rhincodontidae</b>
37009001	Megamouth Shark — <i>Megachasma pelagios</i> Taylor, Compagno & Struhsaker, 1983	37014001	Whale Shark — <i>Rhincodon typus</i> Smith, 1828
<b>37009000</b>	<b>GOBLIN SHARKS — Mitsukurinidae</b>	<b>37015000</b>	<b>CATSHARKS — Scyliorhinidae</b>
37009002	Goblin Shark — <i>Mitsukurina owstoni</i> Jordan, 1898	37015021	Smoothbelly Catshark — <i>Apristurus longicephalus</i> Nakaya, 1975
<b>37009000</b>	<b>CROCODILE SHARKS — Pseudocarchariidae</b>	37015027	Grey Spotted Catshark — <i>Asymbolus analis</i> (Ogilby, 1885)
37009003	Crocodile Shark — <i>Pseudocarcharias kamoharai</i> (Matsubara, 1936)	37015023	Blotched Catshark — <i>Asymbolus funebris</i> Compagno, Stevens & Last, 1999
<b>37010000</b>	<b>MACKEREL SHARKS — Lamnidae</b>	37015026	Western Spotted Catshark — <i>Asymbolus occidus</i> Last, Gomon & Gledhill, 1999
37010003	White Shark — <i>Carcharodon carcharias</i> (Linnaeus, 1758)	37015025	Pale Spotted Catshark — <i>Asymbolus pallidus</i> Last, Gomon & Gledhill, 1999
37010001	Shortfin Mako — <i>Isurus oxyrinchus</i> Rafinesque, 1810	37015022	Dwarf Catshark — <i>Asymbolus parvus</i> Compagno, Stevens & Last, 1999
37010002	Longfin Mako — <i>Isurus paucus</i> Guitart Manday, 1966	37015024	Orange Spotted Catshark — <i>Asymbolus rubiginosus</i> Last, Gomon & Gledhill, 1999
37010004	Porbeagle — <i>Lamna nasus</i> (Bonnaterre, 1788)	37015010	Variegated Catshark — <i>Asymbolus submaculatus</i> Compagno, Stevens & Last, 1999
<b>37011000</b>	<b>BASKING SHARKS — Cetorhinidae</b>	37015003	Gulf Catshark — <i>Asymbolus vincenti</i> (Zietz, 1908)
37011001	Basking Shark — <i>Cetorhinus maximus</i> (Gunnerus, 1765)	37015005	Banded Catshark — <i>Atelomycterus fasciatus</i> Compagno & Stevens, 1993
<b>37012000</b>	<b>THRESHER SHARKS — Alopiidae</b>	37015028	Marbled Catshark — <i>Atelomycterus macleayi</i> Whitley, 1939
37012003	Pelagic Thresher — <i>Alopias pelagicus</i> Nakamura, 1935	37015029	Blackspotted Catshark — <i>Aulohalaelurus labiosus</i> (Waite, 1905)
37012002	Bigeye Thresher — <i>Alopias superciliosus</i> (Lowe, 1839)	37015007	Reticulate Swellshark — <i>Cephaloscyllium fasciatum</i> Chan, 1966
37012001	Thresher Shark — <i>Alopias vulpinus</i> (Bonnaterre, 1788)	37015001	Draughtboard Shark — <i>Cephaloscyllium laticeps</i> (Duméril, 1853)
<b>37013000</b>	<b>COLLAR CARPETSHARKS — Parascylliidae</b>	37015009	Sawtail Catshark — <i>Galeus boardmani</i> (Whitley, 1928)
37013002	Collar Carpetshark — <i>Parascyllium collare</i> Ramsay & Ogilby, 1888	37015008	Slender Sawtail Catshark — <i>Galeus gracilis</i> Compagno & Stevens, 1993
		37015004	Speckled Catshark — <i>Halaenurus boesemani</i> Springer & D'Aubrey, 1972
		<b>37016000</b>	<b>FALSE CATSHARKS — Pseudotriakidae</b>
		37016001	False Catshark — <i>Pseudotriakis microdon</i> Capello, 1868

<b>37017000</b>	<b>HOUND SHARKS — Triakidae</b>	
37017003	Whiskery Shark — <i>Furgaleus macki</i> (Whitley, 1943)	37020010 Harrisson's Dogfish — <i>Centrophorus harrissoni</i> McCulloch, 1915
37017008	School Shark — <i>Galeorhinus galeus</i> (Linnaeus, 1758)	37020001 Endeavour Dogfish — <i>Centrophorus moluccensis</i> Bleeker, 1860
37017010	Darksnout Houndshark — <i>Hemitriakis abdita</i> Compagno & Stevens, 1993	37020009 Leafscale Gulper Shark — <i>Centrophorus squamosus</i> (Bonnaterre, 1788)
37017009	Sicklefin Houndshark — <i>Hemitriakis falcata</i> Compagno & Stevens, 1993	37020011 Southern Dogfish — <i>Centrophorus uyato</i> (Rafinesque, 1810)
37017006	Pencil Shark — <i>Hypogaleus hyugaensis</i> (Miyosi, 1939)	37020003 Brier Shark — <i>Deania calcea</i> (Lowe, 1839)
37017007	Longnose Houndshark — <i>Iago garricki</i> Fourmanoir & Rivaton, 1979	37020004 Longsnout Dogfish — <i>Deania quadrispinosa</i> (McCulloch, 1915)
37017001	Gummy Shark — <i>Mustelus antarcticus</i> Günther, 1870	
<b>37018000</b>	<b>WHALER SHARKS — Carcharhinidae</b>	
37018027	Silvertip Shark — <i>Carcharhinus albimarginatus</i> (Rüppell, 1837)	<b>37020000</b> <b>KITEFIN SHARKS — Dalatiidae</b>
37018012	Bignose Shark — <i>Carcharhinus altimus</i> (Springer, 1950)	37020002 Black Shark — <i>Dalatias licha</i> (Bonnaterre, 1788)
37018033	Graceful Shark — <i>Carcharhinus amblyrhynchoides</i> (Whitley, 1934)	37020034 Pygmy Shark — <i>Euprotomicrus bispinatus</i> (Quoy & Gaimard, 1824)
37018030	Grey Reef Shark — <i>Carcharhinus amblyrhynchos</i> (Bleeker, 1856)	37020014 Smalltooth Cookiecutter Shark — <i>Isistius brasiliensis</i> (Quoy & Gaimard, 1824)
37018026	Pigeye Shark — <i>Carcharhinus amboinensis</i> (Müller & Henle, 1839)	37020043 Largetooth Cookiecutter Shark — <i>Isistius plutodus</i> Garrick & Springer, 1964
37018001	Bronze Whaler — <i>Carcharhinus brachyurus</i> (Günther, 1870)	37020017 Smalleye Pygmy Shark — <i>Squaliolus aliae</i> Teng, 1959
37018023	Spinner Shark — <i>Carcharhinus brevipinna</i> (Müller & Henle, 1839)	<b>37020000</b> <b>LANTERN SHARKS — Etmopteridae</b>
37018034	Nervous Shark — <i>Carcharhinus caudatus</i> (Whitley, 1945)	37020024 Bareskin Dogfish — <i>Centroscyllium kamoharai</i> Abe, 1966
37018009	Whitecheek Shark — <i>Carcharhinus dussumieri</i> (Valenciennes, 1839)	37020027 Smooth Lanternshark — <i>Etmopterus bigelowi</i> Shirai & Tachikawa, 1993
37018008	Silky Shark — <i>Carcharhinus falciformis</i> (Bibron, 1839)	37020032 Short-tail Lanternshark — <i>Etmopterus brachyurus</i> Smith & Radcliffe, 1912
37018035	Creek Whaler — <i>Carcharhinus fitzroyensis</i> (Whitley, 1943)	37020029 Pink Lanternshark — <i>Etmopterus dianthus</i> Last, Burgess & Seret, 2002
37018040	Galapagos Shark — <i>Carcharhinus galapagensis</i> (Snodgrass & Heller, 1905)	37020031 Lined Lanternshark — <i>Etmopterus dislineatus</i> Last, Burgess & Seret, 2002
37018021	Bull Shark — <i>Carcharhinus leucas</i> (Valenciennes, 1839)	37020030 Blackmouth Lanternshark — <i>Etmopterus evansi</i> Last, Burgess & Seret, 2002
37018039	Common Blacktip Shark — <i>Carcharhinus limbatus</i> (Valenciennes, 1839)	37020028 Pygmy Lanternshark — <i>Etmopterus fusus</i> Last, Burgess & Seret, 2002
37018032	Oceanic Whitetip Shark — <i>Carcharhinus longimanus</i> (Poey, 1861)	37020021 Southern Lanternshark — <i>Etmopterus granulosus</i> (Günther, 1880)
37018025	Hardnose Shark — <i>Carcharhinus maculot</i> (Müller & Henle, 1839)	37020005 Blackbelly Lanternshark — <i>Etmopterus lucifer</i> Jordan & Snyder, 1902
37018036	Blacktip Reef Shark — <i>Carcharhinus melanopterus</i> (Quoy & Gaimard, 1824)	37020033 Moller's Lanternshark — <i>Etmopterus molleri</i> Whitley, 1939
37018003	Dusky Whaler — <i>Carcharhinus obscurus</i> (Lesueur, 1818)	37020015 Slender Lanternshark — <i>Etmopterus pusillus</i> (Lowe, 1839)
37018007	Sandbar Shark — <i>Carcharhinus plumbeus</i> (Nardo, 1827)	<b>37020000</b> <b>SLEEPER SHARKS — Somniidae</b>
37018013	Spot-tail Shark — <i>Carcharhinus sorrah</i> (Valenciennes, 1839)	37020025 Portuguese Dogfish — <i>Centroscymnus coelolepis</i> Bocage & Capello, 1864
37018014	Australian Blacktip Shark — <i>Carcharhinus tilstoni</i> (Whitley, 1950)	37020012 Golden Dogfish — <i>Centroscymnus crepidater</i> (Bocage & Capello, 1864)
37018022	Tiger Shark — <i>Galeocerdo cuvier</i> (Péron & Lesueur, 1822)	37020019 Owston's Dogfish — <i>Centroscymnus owstonii</i> Garman, 1906
37018005	Sliteye Shark — <i>Loxodon macrorhinus</i> Müller & Henle, 1839	37020013 Plunket's Dogfish — <i>Centroscymnus plunketi</i> (Waite, 1910)
37018029	Lemon Shark — <i>Negaprion acutidens</i> (Rüppell, 1837)	37020035 Whitetail Dogfish — <i>Scymnodalatias albicauda</i> Taniuchi & Garrick, 1986
37018004	Blue Shark — <i>Prionace glauca</i> (Linnaeus, 1758)	37020036 Southern Sleeper Shark — <i>Somniosus antarcticus</i> Whitley, 1939
37018006	Milk Shark — <i>Rhizoprionodon acutus</i> (Rüppell, 1837)	37020042 Velvet Dogfish — <i>Zameus squamulosus</i> (Günther, 1877)
37018037	Grey Sharpnose Shark — <i>Rhizoprionodon oligolinx</i> Springer, 1964	<b>37020000</b> <b>DOGFISHES — Squalidae</b>
37018024	Australian Sharpnose Shark — <i>Rhizoprionodon taylori</i> (Ogilby, 1915)	37020026 Mandarin Shark — <i>Cirrhigaleus barbifer</i> Tanaka, 1912
37018038	Whitetip Reef Shark — <i>Triaenodon obesus</i> (Rüppell, 1837)	37020008 Whitespotted Dogfish — <i>Squalus acanthias</i> Linnaeus, 1758
<b>37018000</b>	<b>WEASEL SHARKS — Hemigaleidae</b>	37020006 Spikey Dogfish — <i>Squalus megalops</i> (Macleay, 1881)
37018020	Weasel Shark — <i>Hemigaleus australiensis</i> White, Last & Compagno, 2005	37020007 Greeneye Dogfish — <i>Squalus mitsukurii</i> Jordan & Snyder, 1903
37018011	Fossil Shark — <i>Hemipristis elongata</i> (Klunzinger, 1871)	<b>37021000</b> <b>PRICKLY DOGFISHES — Oxynotidae</b>
<b>37019000</b>	<b>HAMMERHEAD SHARKS — Sphyrnidae</b>	37021001 Prickly Dogfish — <i>Oxynotus bruniensis</i> (Ogilby, 1893)
37019003	Winghead Shark — <i>Eusphyra blochii</i> (Cuvier, 1816)	<b>37022000</b> <b>BRAMBLE SHARKS — Echinorhinidae</b>
37019001	Scalloped Hammerhead — <i>Sphyrna lewini</i> (Griffith & Smith, 1834)	37022001 Bramble Shark — <i>Echinorhinus brucus</i> (Bonnaterre, 1788)
37019002	Great Hammerhead — <i>Sphyrna mokarran</i> (Rüppell, 1837)	37022002 Prickly Shark — <i>Echinorhinus cookei</i> Pietschmann, 1928
37019004	Smooth Hammerhead — <i>Sphyrna zygaena</i> (Linnaeus, 1758)	<b>37023000</b> <b>SAWSHARKS — Pristiophoridae</b>
<b>37020000</b>	<b>GULPER SHARKS — Centrophoridae</b>	37023002 Common Sawshark — <i>Pristiophorus cirratus</i> (Latham, 1794)
37020023	Gulper Shark — <i>Centrophorus granulosus</i> (Bloch & Schneider, 1801)	37023001 Southern Sawshark — <i>Pristiophorus nudipinnis</i> Günther, 1870

<b>37024000</b>	<b>ANGELSHARKS — Squatinidae</b>	37035001 Smooth Stingray — <i>Dasyatis brevicaudata</i> (Hutton, 1875)
37024001	Australian Angelshark — <i>Squatina australis</i> Regan, 1906	37035008 Estuary Stingray — <i>Dasyatis fluviorum</i> Ogilby, 1908
37024002	Ornate Angelshark — <i>Squatina tergocellata</i> McCulloch, 1914	37035004 Bluespotted Maskray — <i>Dasyatis kuhlii</i> (Müller & Henle, 1841)
<b>37025000</b>	<b>SAWFISHES — Pristidae</b>	37035013 Painted Maskray — <i>Dasyatis leylandi</i> Last, 1987
37025002	Narrow Sawfish — <i>Anoxypristes cuspidata</i> (Latham, 1794)	37035028 Smalleye Stingray — <i>Dasyatis microps</i> (Annandale, 1908)
37025004	Dwarf Sawfish — <i>Pristis clavata</i> Garman, 1906	37035002 Black Stingray — <i>Dasyatis thetidis</i> Ogilby, 1899
37025003	Freshwater Sawfish — <i>Pristis microdon</i> Latham, 1794	37035010 Pelagic Stingray — <i>Dasyatis violacea</i> (Bonaparte, 1832)
37025005	Wide Sawfish — <i>Pristis pectinata</i> Latham, 1794	37035023 Freshwater Whipray — <i>Himantura chaophraya</i> Monkolprasit & Roberts, 1990
37025001	Green Sawfish — <i>Pristis zijsron</i> Bleeker, 1851	37035024 Pink Whipray — <i>Himantura fai</i> Jordan & Seale, 1906
<b>37026000</b>	<b>WEDGEFISHES — Rhinidae</b>	37035019 Mangrove Whipray — <i>Himantura granulata</i> (Macleay, 1883)
37026002	Shark Ray — <i>Rhina aenkylostoma</i> Bloch & Schneider, 1801	37035025 Jenkins' Whipray — <i>Himantura jenkinsii</i> (Annandale, 1909)
37026001	Whitespotted Guitarfish — <i>Rhynchobatus australiae</i> Whitley, 1939	37035020 Blackspotted Whipray — <i>Himantura toshi</i> Whitley, 1939
<b>37027000</b>	<b>GUITARFISHES — Rhinobatidae</b>	37035003 Reticulate Whipray — <i>Himantura uarnak</i> (Forsskål, 1775)
37027009	Eastern Shovelnose Ray — <i>Aptychotrema rostrata</i> (Shaw & Nodder, 1794)	37035026 Leopard Whipray — <i>Himantura undulata</i> (Bleeker, 1852)
37027007	Spotted Shovelnose Ray — <i>Aptychotrema timorensis</i> Last, 2004	37035011 Cowtail Stingray — <i>Pastinachus sephen</i> (Forsskål, 1775)
37027001	Western Shovelnose Ray — <i>Aptychotrema vincentiana</i> (Haacke, 1885)	37035009 Bluespotted Fantail Ray — <i>Taeniura lymna</i> (Forsskål, 1775)
37027003	Goldeneye Shovelnose Ray — <i>Rhinobatos sainsburyi</i> Last, 2004	37035017 Blotched Fantail Ray — <i>Taeniura meyeni</i> Müller & Henle, 1841
37027010	Giant Shovelnose Ray — <i>Rhinobatos typus</i> Bennett, 1830	37035027 Porcupine Ray — <i>Urogymnus asperimus</i> (Bloch & Schneider, 1801)
37027002	Southern Fiddler Ray — <i>Trygonorrhina fasciata</i> Müller & Henle, 1841	
37027008	Magpie Fiddler Ray — <i>Trygonorrhina melaleuca</i> Scott, 1954

37126005	Ribbon Barracudina — <i>Arctozenus risso</i> (Bonaparte, 1840)
37126006	Indo-Pacific Barracudina — <i>Lestidiops indopacifica</i> (Ege, 1953)
37126003	Pacific Barracudina — <i>Lestidiops jayakari</i> (Boulenger, 1889)
37126007	Atlantic Barracudina — <i>Lestidium atlanticum</i> Borodin, 1928
37126002	Naked Barracudina — <i>Lestidium nudum</i> Gilbert, 1905
37126008	Japanese Barracudina — <i>Lestrolepis japonica</i> (Tanaka, 1908)
37126001	Longfin Barracudina — <i>Macroparalepis macrogeneion</i> Post, 1973
37126004	Duckbill Barracudina — <i>Magnisudis prionosa</i> (Rofen, 1963)
37126009	Tailspot Barracudina — <i>Stemonosudis elegans</i> (Ege, 1933)
37126010	Sharpchin Barracudina — <i>Stemonosudis macrura</i> (Ege, 1933)
37126011	Rothschild's Barracudina — <i>Stemonosudis rothschildi</i> Richards, 1967

**37127000 HAMMERJAWS — Omosudidae**

37127001	Hammerjaw — <i>Omosudis lowii</i> Günther, 1887
----------	---

**37128000 LANCETFISHES — Alepisauridae**

37128002	Shortnose Lancetfish — <i>Alepisaurus brevirostris</i> Gibbs, 1960
37128001	Longnose Lancetfish — <i>Alepisaurus ferox</i> Lowe, 1833
37129000	<b>DAGGERTOOTHS — Anotopteridae</b>
37129001	Southern Daggertooth — <i>Anotopterus vorax</i> (Regan, 1913)

**37130000 SABRETOOTH FISHES — Evermannellidae**

37130001	Atlantic Sabretooth — <i>Coccorella atlantica</i> (Parr, 1928)
37130002	Balbo Sabretooth — <i>Evermannella balbo</i> (Risso, 1820)
37130003	Indian Sabretooth — <i>Evermannella indica</i> Brauer, 1906

**37131000 PEARLEYES — Scopelarchidae**

37131001	Childish Pearleye — <i>Benthalbella infans</i> Zugmayer, 1911
37131002	Winged Pearleye — <i>Rosenblattichthys alatus</i> (Fourmanoir, 1970)
37131003	Dana Pearleye — <i>Scopelarchoides danae</i> Johnson, 1974
37131004	Shortfin Pearleye — <i>Scopelarchus analis</i> (Brauer, 1902)
37131005	Staring Pearleye — <i>Scopelarchus guentheri</i> Alcock, 1896

**37132000 WHALEFISHES — Cetomimidae**

37132001	Parr's Combtooth Whalefish — <i>Gyrinomimus parri</i> Bigelow, 1961
37132002	Birdsnout Whalefish — <i>Rhamphocetichthys savagei</i> Paxton, 1989

**37133000 REDMOUTH WHALEFISHES — Rondeletiidae**

37133001	Common Redmouth Whalefish — <i>Rondeletia loricata</i> Abe & Hotta, 1963
----------	--

**37134000 VELVET WHALEFISHES — Barbourisiidae**

37134001	Redvelvet Whalefish — <i>Barbourisia rufa</i> Parr, 1945
----------	--

**37137000 HAIRYFISHES — Mirapinnidae**

37137001	Short Tapetail — <i>Parataeniophorus brevis</i> Bertelsen & Marshall, 1956
----------	--

**37139000 TELESCOPEFISHES — Giganturidae**

37139001	Chun's Telescopefish — <i>Gigantura chuni</i> Brauer, 1901
37139002	Indian Telescopefish — <i>Gigantura indica</i> Brauer, 1901

**37141000 BEAKED SALMONS — Gonorynchidae**

37141001	Beaked Salmon — <i>Gonorynchus greyi</i> (Richardson, 1845)
----------	---

**37142000 MILKFISHES — Chanidae**

37142001	Milkfish — <i>Chanos chanos</i> (Forsskål, 1775)
----------	--

**37165000 CARPS — Cyprinidae**

37165001	Goldfish — <i>Carassius auratus</i> (Linnaeus, 1758)
37165003	European Carp — <i>Cyprinus carpio</i> Linnaeus, 1758
37165004	Rosy Barb — <i>Puntius conchonius</i> (Hamilton, 1822)
37165005	Roach — <i>Rutilus rutilus</i> (Linnaeus, 1758)
37165006	Mountain Minnow — <i>Tanichthys albonubes</i> Lin, 1932
37165002	Tench — <i>Tinca tinca</i> (Linnaeus, 1758)

**37170000 LOACHES — Cobitidae**

37170001	Oriental Weatherloach — <i>Misgurnus anguillicaudatus</i> (Cantor, 1842)
----------	--

**37188000 FORKTAIL CATFISHES — Ariidae**

- 37188003 Longsnout Catfish — *Arius argyropleuron* Valenciennes, 1840  
 37188011 Copper Catfish — *Arius armiger* De Vis, 1884  
 37188012 Highfin Catfish — *Arius berneyi* (Whitley, 1941)  
 37188002 Two-line Sea Catfish — *Arius bilineatus* (Valenciennes, 1840)  
 37188016 Warrior Catfish — *Arius diocetes* Kailola, 2000  
 37188005 Blue Catfish — *Arius graeffei* Kner & Steindachner, 1867  
 37188004 Ridged Catfish — *Arius hainesi* Kailola, 2000  
 37188017 Flat Catfish — *Arius insidiator* Kailola, 2000  
 37188006 Boofhead Catfish — *Arius leptaspis* (Bleeker, 1862)  
 37188007 Masters' Catfish — *Arius mastersi* Ogilby, 1898  
 37188010 Silver Cobbler — *Arius midgleyi* Kailola & Pierce, 1988  
 37188013 Shieldhead Catfish — *Arius nella* (Valenciennes, 1840)  
 37188015 Shovelnose Catfish — *Arius paucus* Kailola, 2000  
 37188018 Sawspine Catfish — *Arius pectoralis* Kailola, 2000  
 37188008 Arafura Catfish — *Arius proximus* Ogilby, 1898  
 37188001 Giant Sea Catfish — *Arius thalassinus* (Rüppell, 1837)  
 37188014 Smallmouth Catfish — *Cinetodus froggatti* (Ramsay & Ogilby, 1886)

**37192000 EELTAIL CATFISHES — Plotosidae**

- 37192016 Toothless Catfish — *Anodontiglanis dahlii* Rendahl, 1922  
 37192001 Estuary Cobbler — *Cnidoglanis macrocephalus* (Valenciennes, 1840)  
 37192004 Longtail Catfish — *Euristhmus lepturus* (Günther, 1864)  
 37192007 Smallhead Catfish — *Euristhmus microceps* (Richardson, 1845)  
 37192003 Nakedhead Catfish — *Euristhmus nudiceps* (Günther, 1880)  
 37192018 Cooper Creek Catfish — *Neosiluroides cooperensis* Allen & Feinberg, 1998  
 37192009 Black Catfish — *Neosilurus ater* (Perugia, 1894)  
 37192010 Shortfin Catfish — *Neosilurus brevidorsalis* (Günther, 1867)  
 37192017 Dalhousie Catfish — *Neosilurus gloveri* Allen & Feinberg, 1998  
 37192011 Hyrtl's Catfish — *Neosilurus hyrtlii* Steindachner, 1867  
 37192023 Softspine Catfish — *Neosilurus mollespiculum* Allen & Feinberg, 1998  
 37192019 Falsespine Catfish — *Neosilurus pseudospinosus* Allen & Feinberg, 1998  
 37192005 Whitelip Catfish — *Paraplotosus albilateralis* (Valenciennes, 1840)  
 37192020 Sailfin Catfish — *Paraplotosus butleri* Allen, 1998  
 37192022 Kimberley Catfish — *Paraplotosus muelleri* (Klunzinger, 1880)  
 37192013 Eel Catfish — *Plotosus canius* Hamilton-Buchanan, 1822  
 37192002 Striped Catfish — *Plotosus lineatus* (Thunberg, 1791)  
 37192008 Silver Catfish — *Porochilus argenteus* (Zietz, 1896)  
 37192014 Obbes' Catfish — *Porochilus obbesi* Weber, 1913  
 37192012 Rendahl's Catfish — *Porochilus rendahli* (Whitley, 1928)  
 37192015 Freshwater Cobbler — *Tandanus bostocki* Whitley, 1944  
 37192006 Freshwater Catfish — *Tandanus tandanus* (Mitchell, 1838)

**37205000 FROGFISHES — Batrachoididae**

- 37205007 Dahl's Frogfish — *Batrachomoeus dahlii* (Rendahl, 1922)  
 37205008 Eastern Frogfish — *Batrachomoeus dubius* (Shaw, 1790)  
 37205001 Western Frogfish — *Batrachomoeus occidentalis* Hutchins, 1976  
 37205009 Pinkhead Frogfish — *Batrachomoeus rubricephalus* Hutchins, 1976  
 37205003 Threespine Frogfish — *Batrachomoeus trispinosus* (Günther, 1861)  
 37205002 Banded Frogfish — *Halophryne diemensis* (Lesueur, 1824)  
 37205005 Ocellate Frogfish — *Halophryne ocellatus* Hutchins, 1974  
 37205006 Sculptured Frogfish — *Halophryne queenslandiae* (De Vis, 1882)

**37206000 CLINGFISHES — Gobiesocidae**

- 37206007 Short Shore Eel — *Alabes brevis* Springer & Fraser, 1976  
 37206008 Common Shore Eel — *Alabes dorsalis* (Richardson, 1845)  
 37206031 Elongate Shore Eel — *Alabes elongata* Hutchins & Morrison, 2004  
 37206032 Hunchback Shore Eel — *Alabes gibbosa* Hutchins & Morrison, 2004  
 37206009 Dwarf Shore Eel — *Alabes hoesei* Springer & Fraser, 1976  
 37206033 Pugnose Shore Eel — *Alabes obtusirostris* Hutchins & Morrison, 2004  
 37206034 Western Shore Eel — *Alabes occidentalis* Hutchins & Morrison, 2004  
 37206010 Pygmy Shore Eel — *Alabes parvulus* (McCulloch, 1909)  
 37206035 Scott's Shore Eel — *Alabes scotti* Hutchins & Morrison, 2004  
 37206004 Pink Clingfish — *Aspasmogaster costata* (Ogilby, 1885)  
 37206005 Smoothsnout Clingfish — *Aspasmogaster liorhyncha* Briggs, 1955  
 37206006 Western Clingfish — *Aspasmogaster occidentalis* Hutchins, 1984  
 37206001 Tasmanian Clingfish — *Aspasmogaster tasmaniensis* (Günther, 1861)  
 37206002 Broadhead Clingfish — *Cochleocepss bassensis* Hutchins, 1983  
 37206011 Western Cleaner Clingfish — *Cochleocepss bicolor* Hutchins, 1991  
 37206012 Eastern Cleaner Clingfish — *Cochleocepss orientalis* Hutchins, 1991  
 37206013 Spadenose Clingfish — *Cochleocepss spatula* (Günther, 1861)  
 37206014 Green Clingfish — *Cochleocepss viridis* Hutchins, 1991  
 37206023 Samoan Clingfish — *Conidens samoensis* (Steindachner, 1906)  
 37206003 Broad Clingfish — *Creocele cardinalis* (Ramsay, 1882)  
 37206015 Striped Clingfish — *Diademichthys lineatus* (Sauvage, 1883)  
 37206016 Crinoid Clingfish — *Discorerema crinophila* Briggs, 1976  
 37206017 Deepwater Clingfish — *Kopua kuiteri* Hutchins, 1991  
 37206020 Precious Clingfish — *Lepadichthys caritus* Briggs, 1969  
 37206021 Bridled Clingfish — *Lepadichthys frenatus* Waite, 1904  
 37206018 Shark Bay Clingfish — *Lepadichthys sandaracatus* Whitley, 1943  
 37206022 Smallfin Clingfish — *Parvicrepis parvipinnis* (Waite, 1906)  
 37206019 Posidonia Clingfish — *Posidonichthys hutchinsi* Briggs, 1993

**37208000 GOOSEFISHES — Lophiidae**

- 37208002 Shortspine Goosefish — *Lophiodes infrabrunneus* Smith & Radcliffe, 1912  
 37208003 Smooth Goosefish — *Lophiodes mutillus* (Alcock, 1894)  
 37208004 Goosefish — *Lophiodes naresi* (Günther, 1880)  
 37208001 Broadhead Goosefish — *Lophiomus setigerus* (Vahl, 1797)

**37209000 HANDFISHES — Brachionichthyidae**

- 37209002 Spotted Handfish — *Brachionichthys hirsutus* (Lacépède, 1804)  
 37209004 Red Handfish — *Sympterichthys politus* (Richardson, 1844)  
 37209003 Smooth Handfish — *Sympterichthys unipennis* (Cuvier, 1817)  
 37209001 Warty Handfish — *Sympterichthys verrucosus* McCulloch & Waite, 1918

**37210000 FROGFISHES — Antennariidae**

- 37210004 Glauert's Anglerfish — *Allenichthys glauerti* (Whitley, 1944)  
 37210016 Tailjet Anglerfish — *Antennarius analis* (Gosline, 1957)  
 37210017 Freckled Anglerfish — *Antennarius coccineus* (Lesson, 1830)  
 37210018 Giant Anglerfish — *Antennarius commerson* (Latrelle, 1804)  
 37210019 New Guinean Anglerfish — *Antennarius dorehensis* Bleeker, 1859  
 37210008 Shaggy Anglerfish — *Antennarius hispidus* (Schneider, 1801)  
 37210027 Warty Anglerfish — *Antennarius maculatus* (Desjardins, 1840)  
 37210011 Spotfin Anglerfish — *Antennarius nummifer* (Cuvier, 1817)  
 37210020 Painted Anglerfish — *Antennarius pictus* (Shaw & Nodder, 1794)

37309001	Little Dragonfish — <i>Euryptegnas draconis</i> (Linnaeus, 1766)
37309003	Sculptured Seamount — <i>Pegasus lancifer</i> Kaup, 1861
37309002	Slender Seamount — <i>Pegasus volitans</i> Linnaeus, 1758

#### 37310000 GIANT PERCHES — Latidae

37310007	Spikey Bass — <i>Hypopterus macropterus</i> (Günther, 1859)
37310006	Barramundi — <i>Lates calcarifer</i> (Bloch, 1790)
37310001	Sand Bass — <i>Psammoperca waigiensis</i> (Cuvier, 1828)

#### 37310000 GLASSFISHES — Ambassidae

37310009	Agassiz's Glassfish — <i>Ambassis agassizii</i> Steindachner, 1867
37310008	Sailfin Glassfish — <i>Ambassis agrammus</i> Günther, 1867
37310010	Elongate Glassfish — <i>Ambassis elongatus</i> (Castelnau, 1878)
37310004	Barehead Glassfish — <i>Ambassis gymnocephalus</i> (Lacépède, 1802)
37310011	Longspine Glassfish — <i>Ambassis interrupta</i> Bleeker, 1852
37310012	Port Jackson Glassfish — <i>Ambassis jacksoniensis</i> Macleay, 1881
37310013	Macleay's Glassfish — <i>Ambassis macleayi</i> (Castelnau, 1878)
37310018	Estuary Glassfish — <i>Ambassis marijanus</i> Günther, 1880

37310014	Flagtail Glassfish — <i>Ambassis miops</i> Günther, 1872
37310005	Scalloped Glassfish — <i>Ambassis nalua</i> (Hamilton, 1822)
37310002	Vachell's Glassfish — <i>Ambassis vachellii</i> Richardson, 1846
37310016	Pennyfish — <i>Denariusa australis</i> (Steindachner, 1867)
37310017	Giant Glassfish — <i>Parambassis gulliveri</i> (Castelnau, 1878)

#### 37311000 OCEAN BASSES — Acropomatidae

37311167	Japanese Seabass — <i>Acropoma japonica</i> Günther, 1859
37311053	Threespine Cardinalfish — <i>Apogonops anomalus</i> Ogilby, 1896
37311025	Rosy Seabass — <i>Doederleinia berycooides</i> (Hilgendorf, 1879)
37311048	Splendid Seabass — <i>Malakichthys elegans</i> Matsubara & Yamaguchi, 1943
37311187	Grey Seabass — <i>Malakichthys griseus</i> Döderlein, 1883
37311031	Smooth Seabass — <i>Malakichthys levis</i> Yamanoue & Matsuura, 2001
37311184	Mochizuki's Seabass — <i>Malakichthys mochizuki</i> Yamanoue & Matsuura, 2001
37311170	Bass Groper — <i>Polyprion americanus</i> (Bloch & Schneider, 1801)
37311006	Hapuku — <i>Polyprion oxygeneios</i> (Forster, 1801)
37311191	Threespine Seabass — <i>Synagrops analis</i> (Katayama, 1957)
37311054	Glowbelly Seabass — <i>Synagrops japonicus</i> (Döderlein, 1883)
37311028	Sharptooth Seabass — <i>Synagrops philippensis</i> (Günther, 1880)
37311185	Roughspine Seabass — <i>Synagrops serratospinosus</i> Smith & Radcliffe, 1912

#### 37311000 TEMPERATE BASSES — Percichthyidae

37311168	Nightfish — <i>Bostockia porosa</i> Castelnau, 1873
37311183	Bloomfield River Cod — <i>Guyu wujalwujalensis</i> Pusey & Kennard, 2001
37311169	Japanese Seaperch — <i>Lateolabrax japonicus</i> (Cuvier, 1828)
37311181	Clarence River Cod — <i>Maccullochella ikei</i> Rowland, 1986
37311087	Trout Cod — <i>Maccullochella macquariensis</i> (Cuvier, 1829)
37311076	Murray Cod — <i>Maccullochella peelii</i> (Mitchell, 1838)
37311075	Golden Perch — <i>Macquaria ambigua</i> (Richardson, 1845)
37311088	Macquarie Perch — <i>Macquaria australasica</i> Cuvier, 1830
37311033	Estuary Perch — <i>Macquaria colonorum</i> (Günther, 1863)
37311034	Australian Bass — <i>Macquaria novemaculeata</i> (Steindachner, 1866)
37311171	Triplespine Deepwater Cardinalfish — <i>Sphyraenops bairdianus</i> Poey, 1861

#### 37311000 ROCKCODS — Serranidae

37311131	Yellowbanded Wirrah — <i>Acanthistius cinctus</i> (Günther, 1859)
37311090	Eastern Wirrah — <i>Acanthistius ocellatus</i> (Günther, 1859)
37311132	Leopard Wirrah — <i>Acanthistius pardalotus</i> Hutchins, 1981
37311133	Orangelined Wirrah — <i>Acanthistius paxtoni</i> Hutchins & Kuiter, 1982
37311035	Western Wirrah — <i>Acanthistius serratus</i> (Cuvier, 1828)
37311134	Redmouth Rockcod — <i>Aethaloperca rogaa</i> (Forsskål, 1775)
37311085	Whitelined Rockcod — <i>Anyperodon leucogrammicus</i> (Valenciennes, 1828)
37311002	Butterfly Perch — <i>Caesioperca lepidoptera</i> (Forster, 1801)
37311003	Barber Perch — <i>Caesioperca rasor</i> (Richardson, 1839)
37311135	Blowhole Perch — <i>Caesioperca theagenes</i> Whitley, 1945
37311004	Rosy Perch — <i>Callanthias allporti</i> Günther, 1876
37311055	Splendid Perch — <i>Callanthias australis</i> (Ogilby, 1899)
37311189	Kras'yukova's Perch — <i>Caprodon kras'yukovae</i> Kharin, 1983
37311095	Longfin Perch — <i>Caprodon longimanus</i> (Günther, 1859)
37311096	Sunrise Perch — <i>Caprodon schlegelii</i> (Günther, 1859)
37311030	False Scorpionfish — <i>Centrogenys vaigensis</i> (Quoy & Gaimard, 1824)
37311082	Peacock Rockcod — <i>Cephalopholis argus</i> Bloch & Schneider, 1801

37311008	Brownbarred Rockcod — <i>Cephalopholis boenak</i> (Bloch, 1790)	37311155	Foursaddle Grouper — <i>Epinephelus spilotoceps</i> Schultz, 1953
37311136	Bluespotted Rockcod — <i>Cephalopholis cyanostigma</i> (Valenciennes, 1828)	37311018	Blackdotted Grouper — <i>Epinephelus stictus</i> Randall & Allen, 1987
37311137	Bluelined Rockcod — <i>Cephalopholis formosa</i> (Shaw & Nodder, 1812)	37311057	Greasy Rockcod — <i>Epinephelus tauvina</i> (Forsskål, 1775)
37311138	Leopard Rockcod — <i>Cephalopholis leopardus</i> (Lacépède, 1801)	37311073	Yellowspotted Grouper — <i>Epinephelus timorensis</i> Randall & Allen, 1987
37311139	Dot-head Rockcod — <i>Cephalopholis micropriion</i> (Bleeker, 1852)	37311074	Plump Grouper — <i>Epinephelus trophis</i> Randall & Allen, 1987
37311083	Coral Rockcod — <i>Cephalopholis miniata</i> (Forsskål, 1775)	37311068	Potato Rockcod — <i>Epinephelus tukula</i> Morgans, 1959
37311140	Sixband Rockcod — <i>Cephalopholis sexmaculata</i> (Rüppell, 1830)	37311086	Maori Rockcod — <i>Epinephelus undulatostriatus</i> (Peters, 1867)
37311045	Tomato Rockcod — <i>Cephalopholis sonneratii</i> (Valenciennes, 1828)	37311156	Thinspine Grouper — <i>Gracila albomarginata</i> (Fowler & Bean, 1930)
37311141	Strawberry Rockcod — <i>Cephalopholis spiloparaea</i> (Valenciennes, 1828)	37311091	Blackbanded Seaperch — <i>Hypoplectrodes annulatus</i> (Günther, 1859)
37311142	Flagtail Rockcod — <i>Cephalopholis urodetta</i> (Forster, 1801)	37311001	Red Seaperch — <i>Hypoplectrodes cardinalis</i> Allen & Randall, 1990
37311143	Pearly Perchlet — <i>Chelidoperca margaritifera</i> Weber, 1913	37311097	Jameson's Seaperch — <i>Hypoplectrodes jamesoni</i> Ogilby, 1908
37311044	Barramundi Cod — <i>Cromileptes altivelis</i> (Valenciennes, 1828)	37311036	Halfbanded Seaperch — <i>Hypoplectrodes maccullochi</i> Whitley, 1929
37311100	Breaksea Cod — <i>Epinephelides armatus</i> (Castelnau, 1875)	37311037	Banded Seaperch — <i>Hypoplectrodes nigroruber</i> (Cuvier, 1828)
37311015	Banded Grouper — <i>Epinephelus amblycephalus</i> (Bleeker, 1857)	37311099	Spotty Seaperch — <i>Hypoplectrodes wilsoni</i> (Allen & Moyer, 1980)
37311009	Yellowspotted Rockcod — <i>Epinephelus areolatus</i> (Forsskål, 1775)	37311102	Fangtooth Perch — <i>Lepidoperca brochata</i> Katayama & Fujii, 1982
37311062	Frostback Rockcod — <i>Epinephelus bilobatus</i> Randall & Allen, 1987	37311092	Greycheek Basslet — <i>Lepidoperca caesiopercula</i> (Whitley, 1951)
37311041	Duskytail Grouper — <i>Epinephelus bleekeri</i> (Vaillant, 1877)	37311175	Western Orange Perch — <i>Lepidoperca filamenta</i> Roberts, 1987
37311070	Whitespotted Grouper — <i>Epinephelus coeruleopunctatus</i> (Bloch, 1790)	37311103	Sharthead Perch — <i>Lepidoperca magna</i> Katayama & Fujii, 1982
37311007	Goldspotted Rockcod — <i>Epinephelus coioides</i> (Hamilton, 1822)	37311052	Slender Orange Perch — <i>Lepidoperca occidentalis</i> Whitley, 1951
37311066	Coral Grouper — <i>Epinephelus corallicola</i> (Kuhl & van Hasselt, 1828)	37311001	Eastern Orange Perch — <i>Lepidoperca pulchella</i> (Waite, 1899)
37311145	Purple Rockcod — <i>Epinephelus cyanopodus</i> (Richardson, 1846)	37311038	Tasmanian Perch — <i>Lepidoperca tasmanica</i> Norman, 1937
37311077	Black Rockcod — <i>Epinephelus daemelii</i> (Günther, 1876)	37311157	Headband Perch — <i>Liopropoma mitratum</i> Lubbock & Randall, 1978
37311146	Darwin Grouper — <i>Epinephelus darwinensis</i> Randall & Heemstra, 1991	37311158	Yellow Reef Basslet — <i>Liopropoma multilineatum</i> Randall & Taylor, 1988
37311046	Dotted Grouper — <i>Epinephelus epistictus</i> (Temminck & Schlegel, 1843)	37311159	Pinstripe Reef Basslet — <i>Liopropoma susumi</i> (Jordan & Seale, 1906)
37311147	Banded Rockcod — <i>Epinephelus ergastularius</i> Whitley, 1930	37311104	Pygmy Basslet — <i>Luzonichthys waitei</i> (Fowler, 1931)
37311014	Blacktip Rockcod — <i>Epinephelus fasciatus</i> (Forsskål, 1775)	37311161	Spinycheek Seabass — <i>Ostracoberyx paxtoni</i> Quero & Ozouf-Costaz, 1991
37311021	Flowery Rockcod — <i>Epinephelus fuscoguttatus</i> (Forsskål, 1775)	37311005	Harlequin Fish — <i>Othos dentex</i> (Cuvier, 1828)
37311019	Treeelin Rockcod — <i>Epinephelus heniochus</i> Fowler, 1904	37311105	Allen's Perchlet — <i>Plectranthias allenii</i> Randall, 1980
37311064	Wirenet Rockcod — <i>Epinephelus hexagonatus</i> (Forster, 1801)	37311027	Japanese Perchlet — <i>Plectranthias japonicus</i> (Steindachner, 1884)
37311148	Blacksaddle Rockcod — <i>Epinephelus howlandi</i> (Günther, 1873)	37311178	Trawl Perchlet — <i>Plectranthias lasti</i> Randall & Hoese, 1995
37311061	Queensland Grouper — <i>Epinephelus lanceolatus</i> (Bloch, 1790)	37311106	Longfin Perchlet — <i>Plectranthias longimanus</i> Weber, 1913
37311043	Striped Grouper — <i>Epinephelus latifasciatus</i> (Temminck & Schlegel, 1843)	37311107	Spot-tail Perchlet — <i>Plectranthias maculicauda</i> (Regan, 1914)
37311149	Snubnose Grouper — <i>Epinephelus macrospilos</i> (Bleeker, 1855)	37311108	Citron Perchlet — <i>Plectranthias megalophthalmus</i> Fourmanoir & Randall, 1979
37311011	Highfin Grouper — <i>Epinephelus maculatus</i> (Bloch, 1790)	37311109	Dwarf Perchlet — <i>Plectranthias nanus</i> Randall, 1980
37311173	Speckled Grouper — <i>Epinephelus magniscutis</i> Postel, Fourmanoir & Guézé, 1963	37311179	Pale Perchlet — <i>Plectranthias pallidus</i> Randall & Hoese, 1995
37311150	Blackspotted Rockcod — <i>Epinephelus malabaricus</i> (Bloch & Schneider, 1801)	37311180	Filamentous Perchlet — <i>Plectranthias robertsi</i> Randall & Hoese, 1995
37311065	Oneblob Grouper — <i>Epinephelus melanostigma</i> Schultz, 1953	37311110	Spotted Perchlet — <i>Plectranthias wheeleri</i> Randall, 1980
37311063	Birdwire Rockcod — <i>Epinephelus merra</i> Bloch, 1793	37311111	Redblob Perchlet — <i>Plectranthias winniensis</i> (Tyler, 1966)
37311177	Netfin Grouper — <i>Epinephelus miliaris</i> (Valenciennes, 1830)	37311081	Passionfruit Coral Trout — <i>Plectropomus areolatus</i> (Rüppell, 1830)
37311151	Comet Grouper — <i>Epinephelus morrhua</i> (Valenciennes, 1833)	37311079	Bluespotted Coral Trout — <i>Plectropomus laevis</i> (Lacépède, 1801)
37311010	Rankin Cod — <i>Epinephelus multinotatus</i> (Peters, 1877)	37311078	Common Coral Trout — <i>Plectropomus leopardus</i> (Lacépède, 1802)
37311152	Eightbar Grouper — <i>Epinephelus octofasciatus</i> Griffin, 1926	37311012	Barcheek Coral Trout — <i>Plectropomus maculatus</i> (Bloch, 1790)
37311069	Specklefin Grouper — <i>Epinephelus ongus</i> (Bloch, 1790)	37311162	Vermicular Cod — <i>Plectropomus oligacanthus</i> (Bleeker, 1854)
37311153	Puzzling Grouper — <i>Epinephelus perplexus</i> Randall, Hoes & Last, 1991	37311112	Yellowback Basslet — <i>Pseudanthias bicolor</i> (Randall, 1979)
37311047	Camouflage Grouper — <i>Epinephelus polyphemus</i> (Bleeker, 1849)	37311113	Red Basslet — <i>Pseudanthias cooperi</i> (Regan, 1902)
37311154	Whitedotted Grouper — <i>Epinephelus polystigma</i> (Bleeker, 1853)	37311114	Fairy Basslet — <i>Pseudanthias dispar</i> (Herre, 1955)
37311040	Longfin Rockcod — <i>Epinephelus quoyanus</i> (Valenciennes, 1830)	37311115	Barrier Reef Basslet — <i>Pseudanthias engelhardti</i> (Allen & Starck, 1982)
37311042	Radiant Rockcod — <i>Epinephelus radiatus</i> (Day, 1868)	37311116	Redstripe Basslet — <i>Pseudanthias fasciata</i> (Kamohara, 1954)
37311190	Redtip Grouper — <i>Epinephelus retouti</i> Bleeker, 1868	37311093	George's Basslet — <i>Pseudanthias georgii</i> (Allen, 1976)
37311022	Chinaman Rockcod — <i>Epinephelus rivulatus</i> (Valenciennes, 1830)	37311117	Pacific Basslet — <i>Pseudanthias huchtkii</i> (Bleeker, 1857)
37311060	Convict Grouper — <i>Epinephelus septicemus</i> (Thunberg, 1793)	37311094	Pink Basslet — <i>Pseudanthias hypselosoma</i> Bleeker, 1878
37311017	Sixbar Grouper — <i>Epinephelus sexfasciatus</i> (Kuhl & van Hasselt, 1828)	37311119	Lori's Basslet — <i>Pseudanthias lori</i> (Lubbock & Randall, 1976)

37311120	Luzon Basslet — <i>Pseudanthias luzonensis</i> (Katayama & Masuda, 1983)	37313028	Blackmargin Dottyback — <i>Pseudochromis tapeinosoma</i> Bleeker, 1853
37311121	Sailfin Queen — <i>Pseudanthias pascalis</i> (Jordan & Tanaka, 1927)	37313018	Yellowfin Dottyback — <i>Pseudochromis wilsoni</i> (Whitley, 1929)
37311122	Painted Basslet — <i>Pseudanthias pictilis</i> (Randall & Allen, 1978)	37313019	Anne's Dottyback — <i>Pseudoplesiops annae</i> (Weber, 1913)
37311123	Mirror Basslet — <i>Pseudanthias pleurotaenia</i> (Bleeker, 1857)	37313020	Lord Howe Dottyback — <i>Pseudoplesiops howensis</i> Allen, 1987
37311124	Lilac-tip Basslet — <i>Pseudanthias rubrizonatus</i> (Randall, 1983)	37313031	Immaculate Dottyback — <i>Pseudoplesiops immaculatus</i> Gill & Edwards, 2002
37311126	Shen's Basslet — <i>Pseudanthias sheni</i> Randall & Allen, 1989	37313024	Rose Dottyback — <i>Pseudoplesiops rosae</i> Schultz, 1943
37311125	Princess Basslet — <i>Pseudanthias smithvanizi</i> (Randall & Lubbock, 1981)	37313025	Ringeye Dottyback — <i>Pseudoplesiops typus</i> Bleeker, 1858
37311127	Orange Basslet — <i>Pseudanthias squamipinnis</i> (Peters, 1855)	37313032	Fleckfin Dottyback — <i>Pseudoplesiops wassi</i> Gill & Edwards, 2003
37311128	Purple Queen — <i>Pseudanthias tuka</i> (Herre & Montalban, 1927)	<b>37314000</b>	<b>FALSE BASSLETS — Pseudogrammatidae</b>
37311163	Longfin Basslet — <i>Pseudanthias ventralis</i> (Randall, 1979)	37314001	Blotched Podge — <i>Aporops bilinearis</i> Schultz, 1943
37311164	Rainfordia — <i>Rainfordia opercularis</i> McCulloch, 1923	37314003	Spotless Podge — <i>Pseudogramma astignum</i> Randall & Baldwin, 1997
37311165	Little Fairy Basslet — <i>Sacura parva</i> Heemstra & Randall, 1979	37314002	Honeycomb Podge — <i>Pseudogramma polyacanthum</i> (Bleeker, 1856)
37311174	Golden Grouper — <i>Saloptia powelli</i> Smith, 1964	37314004	Freckleface Podge — <i>Suttonia lineata</i> Gosline, 1960

 37384052 Lyretail Pigfish — *Bodianus anthioides* (Bennett, 1832)  
 37384053 Coral Pigfish — *Bodianus axillaris* (Bennett, 1832)  
 37384054 Saddleback Pigfish — *Bodianus bilunulatus* (Lacépède, 1801)  
 37384055 Twospot Pigfish — *Bodianus bimaculatus* Allen, 1973  
 37384056 Diana's Pigfish — *Bodianus diana* (Lacépède, 1801)  
 37384062 Masked Pigfish — *Bodianus flavifrons* Gomon, 2001  
 37384035 Yellowfin Pigfish — *Bodianus flavipinnis* Gomon, 2001  
 37384057 Foxfish — *Bodianus frenchii* (Klunzinger, 1880)  
 37384058 Striped Pigfish — *Bodianus izuensis* Araga & Yoshino in Masuda, Araga & Yoshino, 1975  
 37384059 Blackfin Pigfish — *Bodianus loxozonus* (Snyder, 1908)  
 37384060 Eclipse Pigfish — *Bodianus mesothorax* (Bloch & Schneider, 1801)  
 37384007 Goldspot Pigfish — *Bodianus perditio* (Quoy & Gaimard, 1834)  
 37384061 Eastern Pigfish — *Bodianus unimaculatus* (Günther, 1862)  
 37384001 Western Pigfish — *Bodianus vulpinus* (Richardson, 1850)  
 37384064 Floral Maori Wrasse — *Cheilinus chlorourus* (Bloch, 1791)  
 37384066 Redbreast Maori Wrasse — *Cheilinus fasciatus* (Bloch, 1791)  
 37384067 Red Maori Wrasse — *Cheilinus oxycephalus* Bleeker, 1853  
 37384044 Tripletail Maori Wrasse — *Cheilinus trilobatus* Lacépède, 1801  
 37384038 Humphead Maori Wrasse — *Cheilinus undulatus* Rüppell, 1835  
 37384070 Sharpnose Wrasse — *Cheilio inermis* (Forsskål, 1775)  
 37384071 Anchor Tuskfish — *Choerodon anchorago* (Bloch, 1791)  
 37384005 Bluespotted Tuskfish — *Choerodon cauteroma* Gomon & Allen, 1987  
 37384004 Purple Tuskfish — *Choerodon cephalotes* (Castelnau, 1875)  
 37384072 Blue Tuskfish — *Choerodon cyanodus* (Richardson, 1843)  
 37384073 Harlequin Tuskfish — *Choerodon fasciatus* (Günther, 1867)  
 37384074 Bridled Tuskfish — *Choerodon frenatus* Ogilby, 1910  
 37384075 Graphic Tuskfish — *Choerodon graphicus* (De Vis, 1885)  
 37384077 Dagger Tuskfish — *Choerodon jordani* (Snyder, 1908)  
 37384008 Darkspot Tuskfish — *Choerodon monostigma* Ogilby, 1910  
 37384039 Baldchin Groper — *Choerodon rubescens* (Günther, 1862)  
 37384010 Blackspot Tuskfish — *Choerodon schoenleinii* (Valenciennes, 1839)  
 37384009 Wedgetail Tuskfish — *Choerodon sugillatum* Gomon, 1987  
 37384042 Venus Tuskfish — *Choerodon venustus* (De Vis, 1884)  
 37384006 Redstripe Tuskfish — *Choerodon vitta* Ogilby, 1910  
 37384011 Eyebrow Tuskfish — *Choerodon zamboangae* (Seale & Bean, 1907)

37384193 Deepwater Wrasse — *Cirrhilabrus bathophilus* Randall & Nagareda, 2002  
 37384190 Conde's Wrasse — *Cirrhilabrus condei* Allen & Randall, 1996  
 37384079 Blueside Wrasse — *Cirrhilabrus cyanopleura* (Bleeker, 1851)  
 37384080 Exquisite Wrasse — *Cirrhilabrus exquisitus* Smith, 1957  
 37384081 Laboute's Wrasse — *Cirrhilabrus laboutei* Randall & Lubbock, 1982  
 37384082 Lavender Wrasse — *Cirrhilabrus lineatus* Randall & Lubbock, 1982  
 37384189 Morrison's Wrasse — *Cirrhilabrus morrisoni* Allen, 1999  
 37384083 Finespot Wrasse — *Cirrhilabrus punctatus* Randall & Kuiter, 1989  
 37384186 Randall's Wrasse — *Cirrhilabrus randalli* Allen, 1995  
 37384084 Scott's Wrasse — *Cirrhilabrus scottorum* Randall & Pyle, 1989  
 37384085 Peacock Wrasse — *Cirrhilabrus temminckii* Bleeker, 1853  
 37384087 Connie's Wrasse — *Conniella apterygia* Allen, 1983  
 37384088 Western King Wrasse — *Coris auricularis* (Valenciennes, 1839)  
 37384089 Goldlined Wrasse — *Coris aurilineata* Randall & Kuiter, 1982  
 37384090 Redblotched Wrasse — *Coris aygula* Lacépède, 1801  
 37384098 Variegated Wrasse — *Coris batuensis* (Bleeker, 1856)  
 37384091 Doubleheader — *Coris bulbifrons* Randall & Kuiter, 1982  
 37384092 Spot-tail Wrasse — *Coris caudimacula* (Quoy & Gaimard, 1834)  
 37384093 Pinklined Wrasse — *Coris dorsomacula* Fowler, 1908  
 37384094 Clown Wrasse — *Coris gaimard* (Quoy & Gaimard, 1824)  
 37384095 Comb Wrasse — *Coris picta* (Bloch & Schneider, 1801)  
 37384096 Pixy Wrasse — *Coris pictoides* Randall & Kuiter, 1982  
 37384097 Eastern King Wrasse — *Coris sandreyeri* (Hector, 1884)  
 37384099 Knife Wrasse — *Cymolutes praetextatus* (Quoy & Gaimard, 1834)  
 37384100 Razor Wrasse — *Cymolutes torquatus* (Valenciennes, 1840)  
 37384101 Ten-tooth Wrasse — *Decodon pacificus* (Kamohara, 1952)  
 37384102 Yellowtail Wrasse — *Diproctacanthus xanthurus* (Bleeker, 1856)  
 37384103 Little Rainbow Wrasse — *Dotalabrus alleni* Russell, 1988  
 37384018 Castelnau's Wrasse — *Dotalabrus aurantiacus* (Castelnau, 1872)  
 37384104 Slingjaw Wrasse — *Epibulus insidiator* (Pallas, 1770)  
 37384105 Snakeskin Wrasse — *Euperichthys angustipes* Ramsay & Ogilby, 1888  
 37384106 Birdnose Wrasse — *Gomphosus varius* Lacépède, 1801  
 37384194 Argus Wrasse — *Halichoeres argus* (Bloch & Schneider, 1801)  
 37384107 False-eyed Wrasse — *Halichoeres biocellatus* Schultz, 1960  
 37384108 Brownfield's Wrasse — *Halichoeres brownfieldi* (Whitley, 1945)  
 37384109 Pastel-green Wrasse — *Halichoeres chloropterus* (Bloch, 1791)  
 37384110 Golden Wrasse — *Halichoeres chrysus* Randall, 1981  
 37384191 Orangeline Wrasse — *Halichoeres hartzfeldii* (Bleeker, 1852)  
 37384112 Checkerboard Wrasse — *Halichoeres hortulanus* (Lacépède, 1801)  
 37384187 Greyhead Wrasse — *Halichoeres leucurus* (Walbaum, 1792)  
 37384113 Pearly Wrasse — *Halichoeres margaritaceus* (Valenciennes, 1839)  
 37384114 Dusky Wrasse — *Halichoeres marginatus* Rüppell, 1835  
 37384115 Orangefin Wrasse — *Halichoeres melanochir* Fowler & Bean, 1928  
 37384032 Hoeven's Wrasse — *Halichoeres melanurus* (Bleeker, 1851)  
 37384116 Earmuff Wrasse — *Halichoeres melasmapomus* Randall, 1981  
 37384117 Cheek-ring Wrasse — *Halichoeres miniatus* (Valenciennes, 1839)  
 37384118 Cloud Wrasse — *Halichoeres nebulosus* (Valenciennes, 1839)  
 37384037 Bubblefin Wrasse — *Halichoeres nigrescens* (Bloch & Schneider, 1801)  
 37384119 Ornamental Wrasse — *Halichoeres ornatissimus* (Garrett, 1863)  
 37384120 Twotone Wrasse — *Halichoeres prosopaeion* (Bleeker, 1853)  
 37384121 Zigzag Wrasse — *Halichoeres scapularis* (Bennett, 1832)  
 37384122 Threespot Wrasse — *Halichoeres trimaculatus* (Quoy & Gaimard, 1834)
